

PROGRAM INFORMATION

Course Overview

Co-sponsored by the Association of Diabetes Care and Education Specialists, the Harold Hamm Diabetes Care Summit is a one-day course that focuses on the management of the patient with diabetes. It is designed to address the unmet educational needs of the interprofessional diabetes care management team who have a diverse case mix that includes patients with diabetes. The purpose of this conference is to promote excellence in care and provide up-to-date information to enhance knowledge integral to the effective management of diabetes. This continuing education activity is needed because of the explosion of diabetes in our country. The number of persons with diabetes is expected to more than triple by 2050. According to the 2020 National Diabetes Statistics Report from the CDC, diabetes affects 34.2 million people of all ages, which is 10.5 percent of the US population. The Oklahoma State Department of Health also reports a 14 percent prevalence of diabetes in Oklahoma among adults ages 18 and older. In 2021, Oklahoma ranked the fifth highest in diabetes mortality rate in the nation. Because of the size of this problem and the complexity of managing patients with diabetes, health care professionals need continuous training in order to meet the needs of patients with diabetes in our state and region. This course combines best practice strategies and education through case studies and lectures.

Target Audience

Designed for individuals or groups of diabetes care and education specialists including RNs, RDs, Pharmacists, Physician Assistants, MDs, and other health care providers interested in staying up to date on current practices of care for people with diabetes and other related conditions.

Successful Completion

To receive a Statement of Credit you must attend the entire **HHDC Summit**. Your Statement of Credit will be issued **electronically immediately upon submission of the evaluation form**. For questions or issues, please email HHDC@ouhsc.edu.
